The Nevada Natural Resources Plan Setting and Approach

Department of Conservation & Natural Resources

Strategic Plan The Natural Resources Plan The Natural Resource Plan (NRP) will establish an ongoing process and produce a number of products. The NRP will: • Be the next step in achieving the related objectives & strategies in the Department's Strategic Plan • Improve coordination among agencies • Serve as an "umbrella document" as it explains the relationship between, & pulls together, separate state plans & studies • Describe how the state's resource agencies can help resolve resource issues by working with local & federal agencies, tribes, non-profit groups & the public Public Input • Serve as a "scorecard" (or inventory of plans, programs & issues) to help people better understand which agencies are preparing plans and the issues being addressed • Report on the condition & use of natural resources in Nevada This diagram is a conceptual illustration of the NRP and some of its major elements.
